**DEPARTMENT OF COMPUTER SCIENCE**

**UNIVERSITY OF DELHI**

## **ACKNOWLEDGEMENT**

Our views on how, why and when various phases of software development should be executed have changed tremendously (and definitely for better) and to this end we'd like to mention the name of our teacher, '**TUTORIALSDUNIYA.COM**', who with her patience and excellent knowledge walked us through this path of learning.

# REQUIREMENT DOCUMENT

## APP NAME: HEALTH CARE

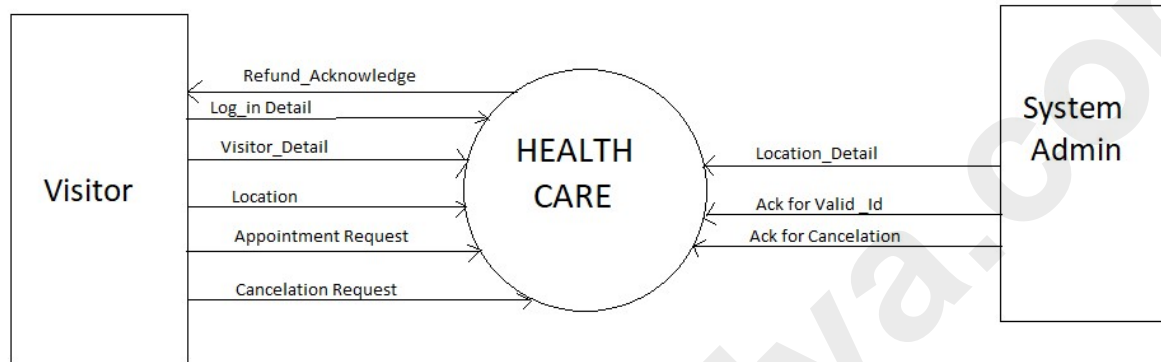

Users: people who need to visit for medical facilities in their location

Healthcare is an app which will provide platform where people can search for medical care . It also provides facilities for booking appointment of doctors .

This app first asks the user to login or signup which will help them to get notifications about medical services present in their location. Based on their location , the users can access physicians, dentist , pathlabs and medical stores. The user can also book appointment doing payment through debit card. They can also make changes in appointment schedule i.e. cancel or postpone the appointment according to their preferences.

# CONTEXT LEVEL DFD

## RISK TABLE

<u>RISK</u>	<u>CATEGORY</u>	<u>PROBABILITY</u>	<u>IMPACT</u>	<u>RMMM</u>
Large number of users than planned	PS	20%	4	
Lack of training on tools	DE	80%	3	
Staff inexperienced	ST	60%	2	
Requirements understanding	PS	50%	2	
Difficulty integrating work	TE	60%	2	
Planning taking up too much time, not enough to work on product	PS	40%	3	

## VALIDATION CODE

### CHECKING PASSWORD VALIDATION

```
1. ifstream fin("VISITOR_FILE",ios::binary);
2. String id,password;
3. Flag=0;
4. gets(id);
5. gets(password);
6. while (fin. read((char*)&e,sizeof(e))
7. {
8. If(id==e.id && password==e.password)
9. {
10.Flag=1;
11.Given access to system continue;
12.}
13.}
14.If(flag==0)
15.cout<<"access denied";
16.fin.close();
17.return;
```

Diagram illustrating line groupings for password validation:

- Lines 1-5 are grouped together, labeled 1.
- Lines 6-7 are grouped together, labeled 2.
- Lines 8-9 are grouped together, labeled 3,4.
- Lines 10-12 are grouped together, labeled 5.
- Line 13 is grouped together, labeled 6.
- Line 14 is grouped together, labeled 7.
- Line 15 is grouped together, labeled 8.
- Lines 16-17 are grouped together, labeled 9.

## FLOW GRAPH

## **Cyclometric Complexity:-**

Number of regions =  $E - V + 2$

$$= 12 - 9 + 3$$

$$= 5$$

Number of regions = number of predicate nodes + 1

$$= 4 + 1$$

$$= 5$$

Number of independent paths = 5

### **Independent paths**

➤ 1-2-7-8-9

➤ 1-2-7-9

➤ 1-2-3-4-5-6-2-7-9

➤ 1-2-3-6-2-7-9

➤ 1-2-3-4-6-2-7-9

## COMPUTING FUNCTIONAL POINT

<u>INFORMATION DOMAIN VALUES</u>	<u>COUNT</u>	<u>WEIGHING FACTOR-SIMPLE</u>	
External inputs	3	3	9
External outputs	2	4	8
External Inquiries	2	3	6
Internal logical files	4	7	28
External interface file	0	5	0
<b>Count total</b>			<b>51</b>

S.No.	QUESTIONS	MARKS
1	Does the system require reliable backup and recovery?	5
2	Are specialized data communications required to transfer information to or from the application?	5
3	Are there distributed processing functions?	0
4	Is performance critical?	5
5	Will the system run in an existing, heavily utilized operational environment?	4
6	Does the system require online data entry?	5
7	Does the online data entry require the input transaction to be built over multiple screens or operations?	5
8	Are the ILFs updated online?	5
9	Are the inputs, outputs, files, or inquiries complex?	1
10	Is the internal processing complex?	2
11	Is the code designed to be reusable?	2
12	Are conversion and installation included in the design?	1
13	Is the system designed for multiple installations in different organizations?	5
14	Is the application designed to facilitate change and ease of use by the user?	5
	<b>TOTAL f(i)</b>	<b>50</b>

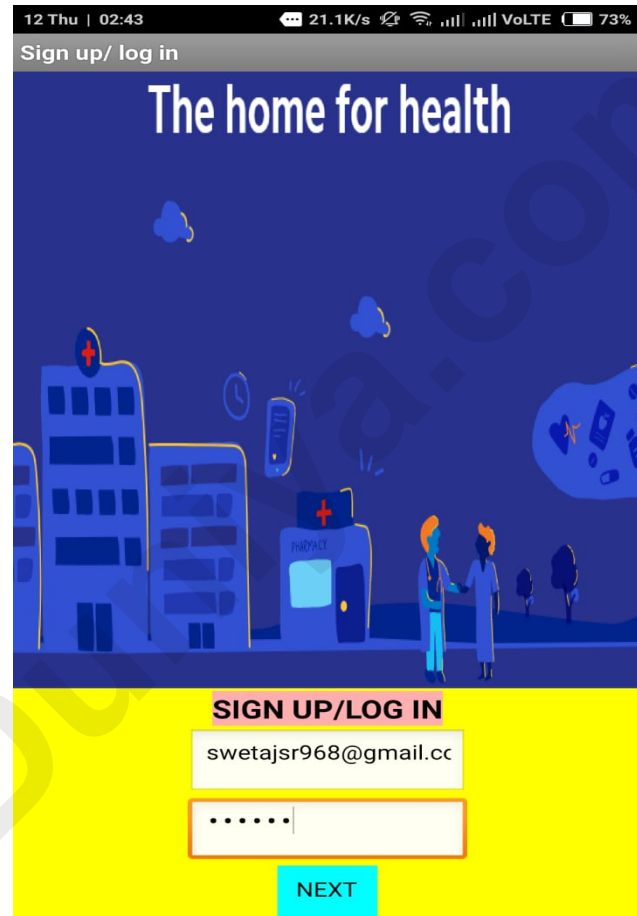

$$FP = \text{count total} * (0.65 + 0.01 * \text{total } f(i))$$

$$= 51 * (0.65 + 0.01 * 50)$$

$$= 51 * 1.15$$

$$= 58.65 = 59(\text{approx.})$$
